

Folded Sorbents and Spill Kits

Issue Date 01/01/04

3M™ Sorbent-Folded

3M sorbent-folded is available for maintenance, chemical and petroleum applications. The handy dispenser box can be placed in areas where spills are most likely to occur. 3M sorbent-folded products can be used as pads, pillows, booms and rolls, allowing you to stock fewer products to meet your sorbent needs. And with perforations every 16 inches, you can select just the right length for the job.

Just identify the type of spill that may occur in certain areas and stock the sorbent that is appropriate.

3M™ Chemical Sorbent-Folded Spill Kits

These spill kits are ideal for containing chemical spills in laboratories and in applications such as police and fire work as well as hazardous spill response. Chemical spill kits are available in 5-gallon and 31-gallon capacities. Since the spill kit incorporates 3M's sorbent-folded technology, it can be used as booms, pillows, pads and rolls.

3M™ Petroleum Sorbent-Folded Spill Kits

Our petroleum sorbent-folded spill kits are available in 5-gallon and 31-gallon capacities. They are excellent for containing and absorbing petroleum-based liquid spills such as fuel dispensing applications where immediate on-site response may be needed. Sorbent-folded can be used as booms, pillows, pads and rolls. The drum is water, chemical, and UV resistant—perfect for outside storage.

 WARNING

Failure to properly handle and dispose of sorbents contaminated by hazardous materials can result in serious physical injury or death and/or environmental harm. For proper handling, consult the Material Safety Data Sheet for the material absorbed, applicable safety and health standards, contact your supervisor, or call 3M at 1 800 243-4630. To reduce the risk of serious physical injury or death, always use respiratory protection and protective clothing appropriate for handling the material to be absorbed. Transportation and disposal of spent sorbents must comply with all applicable federal state and local laws and regulations.

CAUTION:
Sorbents may become slippery when used on flooring. Do not walk on sorbent or place in high traffic areas.
