3M Fire Protection Products
3M™ Fire Block Foam FB-Foam

Get high-speed application AND long-lasting fireblocking protection in a foam.

3M™ Fire Block Foam FB-Foam combines the high-speed application properties of foam and the long-lasting protection of caulk—without the mess. It expands to seal penetrations more effectively than traditional fireblock caulks and also acts as a draftstop to help insulate floors, ceilings and walls.
Help Slow the Spread of Smoke and Flame with 3M™ Fire Block Foam FB-Foam

3M™ Fire Block Foam FB-Foam is a ready-to-use foam fireblock designed to help prevent the spread of flames and smoke in residential Type V and commercial non-rated construction.* During application the foam expands up to 200% in volume to effectively seal interior voids around wires, cables, pipes and other penetrations. It also acts as a draftstop; by restricting air infiltration it helps insulate floors, ceilings and walls.

3M Fire Block Foam FB-Foam meets ASTM E 84 (modified) Class 1 for smoke spread and flame development. It also meets current fireblocking sealant requirements of the International Building Code (IBC) and International Residential Code (IRC), and state and local codes based on the IBC and IRC. 3M Fire Block Foam FB-Foam is recognized as a requirement to the methods prescribed by IBC and/or IRC codes for maintaining the integrity of penetrations of fireblocking and draftstopping.

* Not to be used as a firestop in commercial construction.

Features and Benefits

- Ready-to-use—no mixing required
- Expands up to 200% in volume to quickly and effectively seal openings
- Heat-resistant up to 240°F (115°C)
- Tested to ASTM E 84 (modified) as a Type V Residential Fireblock
- Draftstop—helps reduce air infiltration
- Thermal insulator—R-Value of 4–5 per inch (25.4 mm) typical
- Meets International Building Code (IBC) and International Residential Code (IRC) Fireblocking Requirements
- Excellent adhesion—bonds to concrete, brick, metals, wood, plastic and cable jacketing
- Tack-free in approximately 5 minutes
- Minimal shrinkage and sag-resistance help ensure longevity

Fast, Simple Application

1. Shake can well.
2. Screw nozzle adaptor onto valve stem, being careful not to activate the valve.
3. With valve end of can down, slowly press trigger to dispense foam.
