

3M Architectural Markets
3M™ DI-NOC™ Collection 2011-2013

3M™ DI-NOC™
Architectural Finishes
Collection 2011-2013

The warmth of wood grain. The sleek appearance of metal.
The cool of natural stone, as well as hundreds of other
choices. This range offers 500 patterns, including 105
brand new variations to choose from. 3M™ DI-NOC™
Architectural Finishes give the finish you need to create
a unique visual experience.

What makes 3M™ DI-NOC™ Architectural Finishes better?

Aesthetics. DI-NOC architectural finishes realistically recreate the effects of natural materials and laminates to an astonishing degree. They can deliver the look you want, at the price you need.

Durability. DI-NOC architectural finishes have excellent resistance to water, dirt and wear. Covered by a 12 year warranty for indoor applications and up to 5 years for outdoors, these films utilise 3M's advanced technology to offer outstanding quality and durability.

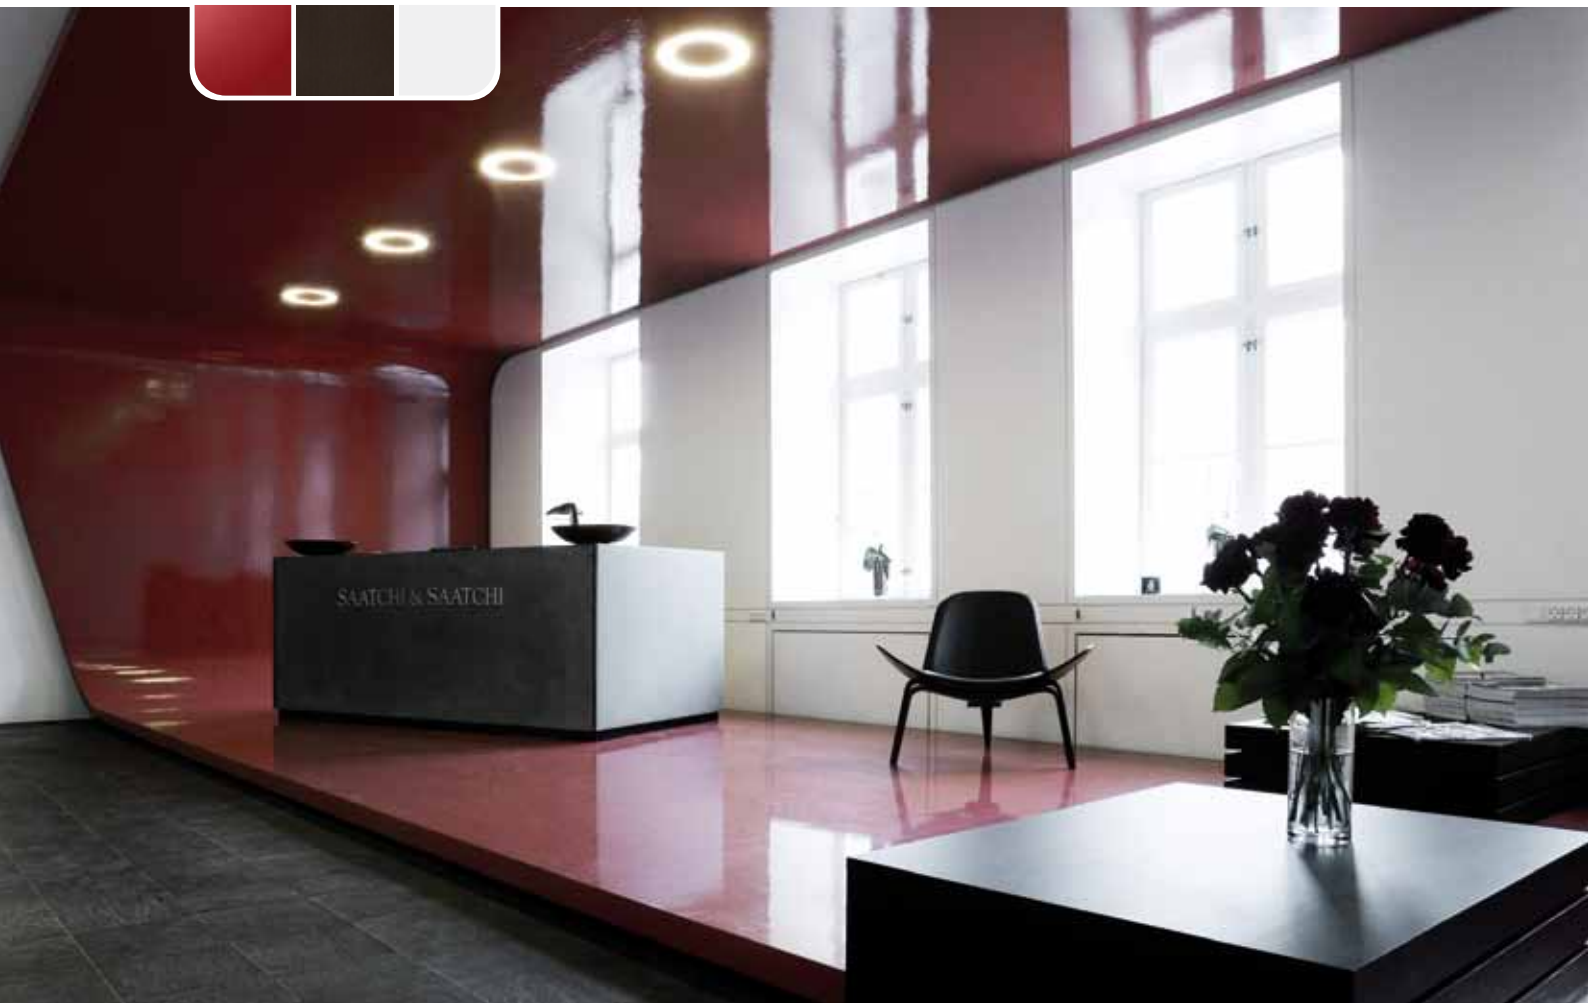

Easy application. 3M™ Comply™ Adhesive Technology allows air to escape through fine air release channels in the adhesive, enabling fast, bubble-free application. Yet it bonds powerfully to virtually any substrate.

Why you should insist on 3M™ DI-NOC™ Architectural Finishes.

For renovations. Lightweight and self-adhering, DI-NOC architectural finishes can be applied on site to the existing substrate, reducing labour and material cost when compared to natural materials. With DI-NOC products, you can create a whole new look, quickly and inexpensively. But not at the expense of aesthetics, thanks to their realistic resemblance to natural materials.

For new construction. Use DI-NOC Architectural finishes alongside natural materials for cost savings, speed of application, durability, and the freedom of choice for you to maintain the aesthetic look you desire.
