

3M™ Kind Removal Silicone Tape

Precision engineered to live up to its name

We care what clinicians think.

Clinicians shared their key priorities.*
We engineered kind technology.

1. Minimize skin damage on patients with fragile skin
2. Minimize the amount of skin damage caused by tape removal
3. Minimize the amount of skin damage caused by dressing removal
4. Maximize the consistency of care (all nurses give same care, every time)

*Among 450 nurses in the U.S., Europe, and Asia.
3M survey conducted April/May 2009.
