

Virtually invisible.

A Solution for Building Owners

**3M**

**Just like the One Pass Mini.**

**Introducing the new 3M™ One Pass Mini Fiber Pathway.**

It's small, discreet (practically invisible) and incredibly versatile, with an exclusive 3M adhesive that sticks to almost any wall surface, including painted concrete. The One Pass Mini delivers triple play services inside a residence and can be used with or without the 3M™ One Pass Fiber Pathway hallway solution, part of the 3M Total Package.

Actual size

*The 3M™ One Pass Mini Fiber Pathway almost disappears into the background for an aesthetically-pleasing broadband solution.*

*3M™ One Pass Mini Fiber Pathway's easy installation*

**The Total Package**

The 3M Total Package is the full-fiber MDU broadband solution for both inside and outside the living unit. It combines the new One Pass Mini Fiber Pathway for living units with the One Pass Fiber Pathway hallway solution and is connected by the fast and easy-to-install 3M™ No Polish Connector.

**3M™ One Pass Fiber Pathway hallway solution**

With the 3M Total Package,  
deploying fiber is as fast and easy as...

**Give your residents what they want.**

With the 3M™ One Pass Fiber Pathways, you can add the fiber services your tenants want, quickly and discreetly.

**1.** The 3M™ One Pass Fiber Pathway hallway solution enables one crew to install one floor of fiber in just one pass. Quietly. Efficiently. Usually in under two hours.

**No staples, no saws,  
no hammers, no kidding.**

Both One Pass Fiber Pathways use exclusive 3M adhesive technology to provide a strong, durable bond between the product and wall surface. There's no need for unsightly staples, sawdust or messy construction.

**Small is beautiful.**

The One Pass Hallway is small (about the width of a pencil), flexible, and paintable and blends with the wall surface.

The new One Pass Mini is even smaller. In fact, it's so small it's virtually invisible.

**2.** The 3M™ No Polish Connector (NPC) quickly connects to the One Pass Hallway or One Pass Mini in under two minutes.

**3.** The 3M™ One Pass Mini Fiber Pathway for inside living units is virtually invisible. Like the One Pass Hallway, it's easy to install on virtually any wall surface, including painted concrete where stapling isn't an option.

*Both 3M™ One Pass Fiber Pathways can be painted, which helps them blend into the wall surface.*

#### **Quiet installation.**

Noise and disruptions are minimized during installation of the One Pass Fiber Pathways. Because advanced 3M adhesive easily attaches to the wall surface, there's no need for noisy tools.

#### **Profitability is knocking. Open the door.**

According to a recent study, almost two out of three apartment residents said they would move because of slow internet service\*. And apartments with fiber broadband are perceived to be more valuable by tenants than those with DSL, cable and satellite.\*\*

In other words, when you give tenants the broadband performance they want, they'll reward you for it.

\* Based on a study of 10,000 MDU residents conducted by J.Turner Research.

\*\* Based on a 2008 study by Parks Associates

### **The Network of Networks**

The 3M Total Package is just one of countless customer-centric innovations from the 3M Network of Networks. A coordinated and connected system of five communications networks (FTTH, xDSL, CATV, Wireless and Enterprise) and 45 technology platforms from a world leader in communications technology.
