

Product Change Notice

3M™ Latch/Eject Header, 2 mm x 2 mm, 1552 Series

Issue Number: 802

Date: August 15, 2011

Product Change – To improve manufacturability, 3M is changing the specification for the insulator material of the Latch/Eject Header 1552 Series. The specification for the product previously read as Glass-Filled Polyester (PCT). Effective immediately, the specification will change to read, “Glass-Filled Polyester (PCT) or Liquid Crystal Polymer (LCP)” at manufacturer’s discretion, with the understanding all product will move toward use of LCP resin in the near term. This change is being made to increase product durability in higher temperature processing applications. Other product specifications, performance, price and delivery will remain unchanged.

3M will begin producing products made with LCP for regular orders beginning Monday, August 15, 2011. Exact switchover dates will vary by pin count and body style. Due to the nature of this change, last time buys (LTB) will not be available. Customers who wish to have samples for product evaluation should contact their 3M Sales Representative immediately.
