Stronger. Faster. Cleaner.

Innovative abrasive construction with chevron multihole extraction combines with a new accessory range to offer the very best solution to efficient filler sanding.

“3M Purple+ sheets don't clog; I can get the job done faster with less product”

Chris Jackson, Panel Beater, Seward Accident Repair Centres Ltd.

Hookit™ Purple+ Multihole Abrasive Sheets use proven abrasive technology that enables bodyshops to increase profitability by:

- Increasing vehicle repair throughput
- Working to an efficient process
- Reducing material consumption

Faster cutting abrasives combine with efficient dust extraction

- Increased cutting power
- Reduced loading allowing the operative to work faster for longer!

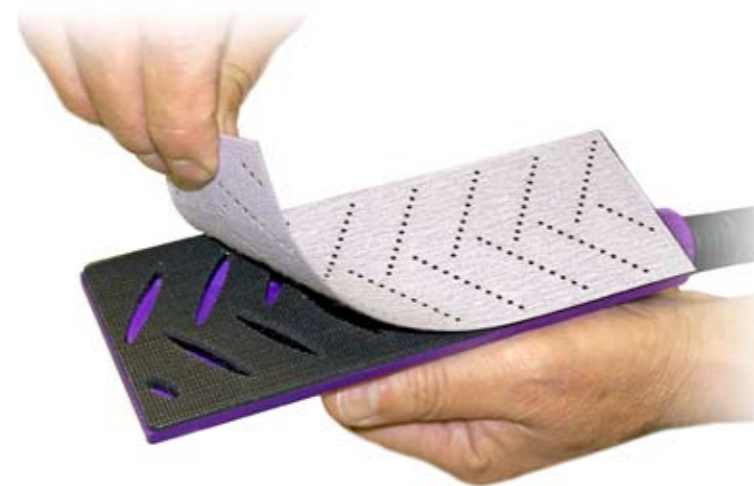

Direct air flow

Increased cutting power

Increased dust!

The 3M solution to achieve maximum dust extraction is to add hundreds of 2mm holes that have been purposely arranged on the sheet in a chevron formation.

Direct air flow from panel to extraction system is achieved by aligning the chevron pattern with oval slots on the upgraded handblocks.

See the amazing multihole sheets in action at www.3M.eu/multihole1

No matter how efficient the system, there will always be some airborne dust particles. 3M recommends the use of maintenance-free respirators

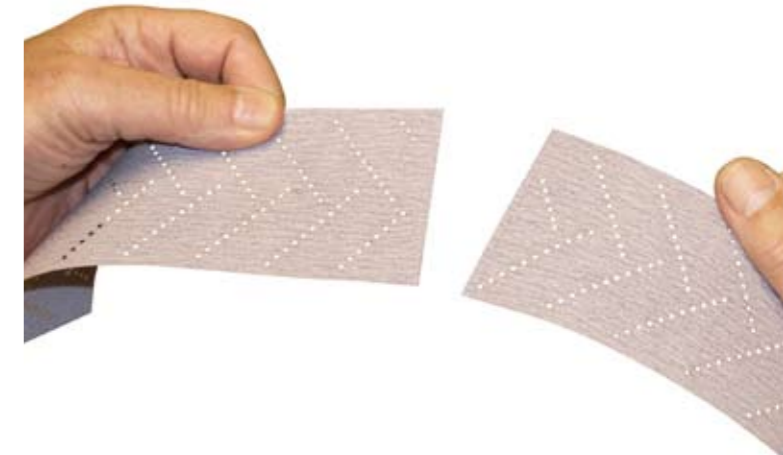

06922 - Cup shaped valved respirator

06923 - Foldable valved respirator

NEW!

Purple+ Kiss-cut Underscore Technology

The kiss-cut underscore technology enables the 396mm-long abrasive sheet to be easily converted into two fit-for-purpose 198mm sheets.

Both bodyshops and distribution can benefit from:

- Cutting stock numbers by up to 50%
- Less stockholding
- Increased stock turnover – reducing slow moving products

Tony Aquilina, Group Procurement Manager, Seward Accident Repair Centres Ltd.

“The 3M Purple+ sheet is a real bonus as it has reduced our stockholding”
