## 3M™ DIN Connector, Compact PCI™ (CP2) Series, Color Change

Issue Number: 807

Date: October 11, 2011

### Product Change

In order to improve supply efficiency, 3M is transitioning the insulator material color for select DIN and CompactPCI-CP2 product lines to Pantone 428C effective immediately (see color swatch on the right).

This is only a change to the color of the insulator material, not the insulator itself; therefore, the functionality and technical characteristics of the connector will remain the same. Furthermore, part numbers will not change due to this transition. All part numbers beginning with “DIN” or “CP2” in the Tech Sheets listed below are impacted by this change:
