On A Mission

# 3M™ Bair Hugger™ Therapy Spinal Underbody Blanket Model 575

The spinal underbody blanket is designed to work with the open frame of the spinal surgery cradle, and the Wilson™ frame.

3M™ Bair Hugger™ spinal underbody blanket shown with the footboard and ProneView™ protective helmet.

This advanced forced-air warming blanket does not interfere with the adjustment of the patient support pads and provides clinicians with full patient visualization and unrestricted patient access.

3M™ Bair Hugger™ spinal underbody blanket shown with the sling and ProneView™ protective helmet.

# 3M™ Bair Hugger™ Therapy Spinal Underbody Blanket Model 575

## Features

The under-the-patient design of the spinal underbody blanket provides full, unrestricted patient access

- Unique fluid outlets minimize pooling of fluids on the surface of the blanket
- Removable section allows visualization of the patient's face throughout the procedure
- Perforations on the side of the blanket allow either the table frame or Wilson™ frame to pass through the blanket
- Integrated tie strips secure the blanket to the table frame
- Soft, radiolucent materials accommodate imaging requirements
- One drape (included) helps maintain warm air around the head of the intubated patient
