Precision Performance

The 3M™ Wheel Weight System combines conformable wheel balancing material and industry-leading 3M™ Automotive Attachment Tape to provide a precise, all-in-one, securely attached wheel weight balancing system.

Balancing science and responsibility.

Reduced cost of ownership

The 3M Wheel Weight material is provided as a roll good designed to be cut to weight. This provides precision balancing, which enables customers to reduce their cost of ownership by eliminating traditional wheel weight inventories of individual part sizes.

Lead-free, corrosion-free design

Designed to replace environmentally harmful lead wheel weights, corrosion-free 3M Wheel Weights enable maintenance of expensive wheels and enhance overall vehicle appearance.

The 3M™ Wheel Weight System is a proprietary product with unique properties built to meet our customers' ever-increasing needs for sustainable, quality products.

The 3M Wheel Weight System consists of a unique, flexible and conformable material available in an easy-to-use, self-dispensing package used with a stand and cutting device.
