PRODUCT CLINICAL DATA SUMMARY

NO. 9776
3M Foam Medical Tape
Effective: March 2002

The adhesive on No. 9776 3M Tan Foam Medical Tape, used with a similar foam backing has been subjected to the following safety evaluations:

**In Vitro Cytotoxicity (Agar Overlay)**
**Results:** 0.0/0.0

**Repeat Skin Irritation in Albino Rabbits**
**Results:** 0.0/8.0

**Repeated Insult Patch Test (Draize) in Humans**
**Results:** No allergic contact dermatitis or untoward effects observed.

**21-day Cumulative Irritation in Humans**
**Results:** Results were consistent with responses characteristic of adhesive materials; no untoward effects.

In addition, the foam alone has been subjected to the following tests:
- Primary Skin Irritation Test (FHSA) – non-irritating
- Ocular Irritation Study (USP/NF) – no evidence of significant eye irritation
- Cytotoxicity- Agarose Overlay, Solid – non-cytotoxic

These tests are in accordance with the ISO 10993 Part-1 "Biological Evaluation of Medical Devices", as put forth by the FDA. The adhesive used with No. 9776 has satisfied the requirements for devices in contact with intact skin for short-term application (up to 29 days). All laboratory testing was conducted in accordance with the FDA Good Laboratory Practices Regulation of 1978.

It is the responsibility of our customers to determine the final suitability of our products for their application.
