

3M Science.
Applied to Life.™

All weather for all your toughest applications.

3M™ All Weather Flashing Tape 8067

Create weatherproof seals around windows, doors, rigid insulation or other external wall penetrations with 3M™ All Weather Flashing Tape 8067. Engineered to increase productivity, the high tack acrylic adhesive does not require primer. It sticks and stays stuck to damp surfaces and doesn't bleed in high heat conditions. The extremely flexible backing passes nail sealability requirements and most silicones and sealants adhere to it extremely well.

0 to 150°F

Application temperature

Highly Compatible

with other materials

Sticks & stays

on damp surfaces

Let's Build Smarter.

Benefits

- Fast and convenient application—excellent elongation enables wrapping contours around windows without cutting multiple pieces
- Split liner for easy and accurate positioning of tape
- Grabs fast and tight even on damp surfaces
- No adhesive melting or staining in summer heat
- Thin design reduces aggregate thickness
- Effectively seals around nails and staples
- Passes nail sealability before and after thermal cycling
- No adverse reaction with most sealants
- Resists UV exposure up to 1 year
- BRANZ appraised #775 (2012)

Extended temperature range increases production

Productivity in all conditions—application temperatures from 0° to 150°F (-18° to 66°C)

3M acrylic adhesive increases compatibility

Compatible with a wide range of common sealants, including butyl, silicone, and polyurethane

Works in all weather

High-tack acrylic adhesive sticks to damp surfaces
