

3M™ Flexible Magnet Tape

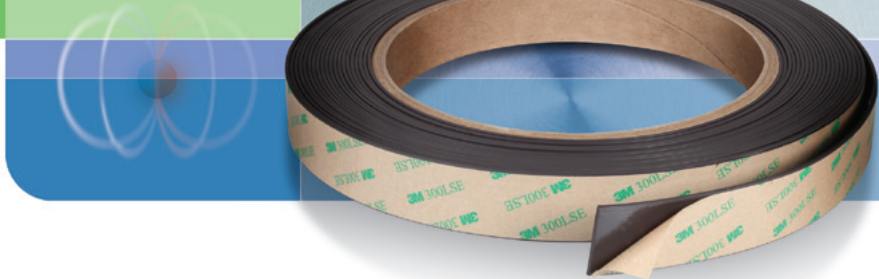

Bendable. Bondable.
Adaptable.
Dependable.

3M™ Flexible Magnet Tape
for versatile attachment solutions

- Powerful, high-strength magnet tape
- Bends, holds and sticks to curved, twisted, or irregular surfaces
- Strong acrylic adhesive bonds to most surfaces
- Unequaled flexibility without cracking or breaking
- Designed for durability and performance

3M

3M™ Flexible Magnet Tape

3M™ Flexible Magnet Tape is built with a strong – yet unbelievably flexible – polymer composite. 3M magnet tape holds fast around sharp curves, twists, and irregular surfaces without popping off. Backed by a strong acrylic adhesive, the tape will attach nearly any material to a metal surface. Additionally, the tape's ability to conform to odd surfaces expands its range of applications far beyond those associated with traditional stiff magnetic strip.

Virtually Endless Applications

INDUSTRIAL	MANUFACTURING	HOME AND OFFICE
Mounting signage	Container attachment	Arts and crafts
Building displays	Securing baggage	Hanging artwork
Securing metal doors (i.e., bathroom shower doors)	Garments and clothing	Hanging window coverings
Reusable masking (i.e., die cuts)	Door seals	Temporary attachment of seasonal decorations
Attaching tools to machinery	Electronics	Labeling

Increased Flexibility

Increases Magnetic Wet Out

3M™ Flexible Magnet Tape's advanced polymer composite provides the flexibility to achieve superior magnetic and adhesive wet out. This increased magnetic surface contact and increased adhesive surface contact provides the outstanding results and performance that traditional tapes typically cannot provide.

Sticks Strong

The acrylic adhesive backing will bond to many challenging materials, including powder-coated paint, low-surface-energy (LSE) plastics such as polypropylene, wood, fabric, and fiberboard. The acrylic adhesive even bonds well to surfaces lightly contaminated with oil typically used with machine parts.

Lasts Long

3M™ Flexible Magnet Tape will not crack, resulting in the most durable magnetic solution available from 3M.

Product Use: All statements, technical information and recommendations contained in this document are based upon tests or experience that 3M believes are reliable. However, many factors beyond 3M's control can affect the use and performance of a 3M product in a particular application, including the conditions under which the product is used and the time and environmental conditions in which the product is expected to perform. Since these factors are uniquely within the user's knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable for the user's method of application.

Warranty and Limited Remedy: Unless stated otherwise in 3M's product literature, packaging inserts or product packaging for individual products, 3M warrants that each 3M product meets the applicable specifications at the time 3M ships the product. Individual products may have additional or different warranties as stated on product literature, package inserts or product packages. 3M makes no other warranties, express or implied, including, but not limited to, any implied warranty of merchantability or fitness for a particular purpose or any implied warranty arising out of a course of dealing, custom or usage of trade. User is responsible for determining whether the 3M product is fit for a particular purpose and suitable for user's application. If the 3M product is defective within the warranty period, your exclusive remedy and 3M's seller's sole obligation will be, at 3M's option, to replace the product or refund the purchase price.

Limitation of Liability: Except where prohibited by law, 3M and seller will not be liable for any loss or damage arising from the 3M product, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.
