Everyday, engineers and technicians around the world choose 3M products as the best solution for their manufacturing and repair needs. From Specifications and Endorsements to Service Bulletins and Recall Notices, 3M is proud to be a trusted partner of the Automotive Industry.

Here's just one example…
After the strength and safety tests of the structural adhesive performed at CESVI Mexico, it was found that:

- 3M Panel Bonding Adhesive is easy to handle, since it is applied with an applicator gun.
- While specific training is required for working with the product, special tools are not required.
- It adheres well to steel or aluminum sheets.
- Does away with the use of anti-rust products in the application area.
- It does away with the protection of the adjacent parts, since there is no weld splattering.
- Corrosion and deformation caused by heating during welding is eliminated.
- Repair time is shorter.
- It has proven efficient with regard to the safety and strength where the parts are bonded together.
