Everyday, engineers and technicians around the world choose 3M products as the best solution for their manufacturing and repair needs. From Specifications and Endorsements to Service Bulletins and Recall Notices, 3M is proud to be a trusted partner of the Automotive Industry.

Here’s just one example…
Description

Vehicles: N/A

Purpose: The materials defined by this specification are pumpable, two component, air dry curing, weldable, or rivetable structural adhesives for aluminum.

This specification is released for materials used to structurally bond body components such as: top rails, quarter panels, roofs, rear sills, and cross members to floor pans and inners to outers in a wheel house. These adhesives can be used to bond E-coated service parts including pretreated aluminum sheet, castings, and extrusions during warranty and after collision damage repairs.

Note: 3M provides this information for REFERENCE ONLY. ALWAYS refer to the original document or the OEM-provided model-specific collision damage repair manuals for complete instructions.
