3M™ Protective Coverall 4510

Splash and Dust Protection

The 3M™ Protective Coverall 4510 is constructed with a high quality laminated microporous material and is designed to offer cost effective protection against hazardous dusts and light liquid splashes.

The Power to Protect Your World™

Protective Coverall 4510

The 4510 is an economic solution to help protect from certain chemical splashes such as paint spray and is certified to the PPE Directive Category III and Type 5/6 protection standards. The material is microporous, allowing air to escape from within the suit, while helping to protect from

Key Features

- Excellent barrier against dry particles and certain liquid chemical splashes (CE Type 5/6)
- Laminated microporous material
- 2-way zipper for added on-off convenience and storm flap for extra protection
- Elastic cuffs, waist and ankles for a better fit and freedom of movement
- Ultra low-linting material
- Anti-static treatment

Fabric material

The 4510 material is anti-static and made using a layer of soft, spunbond polypropylene and a layer of light, but high quality and strong polyethylene laminate film giving good levels of barrier efficiency and protection.

Application*

Popular Choice

- Light Industrial Cleaning
- Machine Maintenance
- Paint Spraying & Powder coating
- Coating & resin applications
- Crimescene investigation

Suitable for Consideration

- Asbestos inspection and removal
- Site preparation, insulation.
- Cement manufacturing
- Grinding & Polishing
- Pharmaceutical processing and handling toxic powders

*In all cases, a risk assessment should be carried out. Always read product user information. Use limitations and performance data should be considered to ascertain the protection required. If in doubt, contact a safety professional.

**See user instructions or technical datasheets for full details.
