

Tools Available for Electronic Transactions

3M is continually striving to improve its processes within all areas of the corporation. Transacting business in an electronic environment is the industry standard. eCommerce is a key enabler for reducing costs and improving data quality. The use of electronic transactions is a requirement of doing business with 3M. This can be done with a web-based application or a supplier's own in-house EDI system. The supplier should work with the eCommerce team for eTool selection.

**Any questions relating to this process, please contact the 3M eCommerce team:
STPeCommerceAmericas@mmm.com**

Below are options for Electronic Transaction Processing with 3M USA. These transactions include purchase orders, purchase order acknowledgements, invoices, and payments.
