

3M™ E-A-Rfit™ Validation System

Technology That Takes Hearing Conservation to the Next Level

Environmental controls, hearing protectors, and on-the-job training are the first steps to help protect your workers against noise-induced hearing loss (NIHL). Take the next step with the 3M™ E-A-Rfit™ Validation System, an objective, quantitative hearing protector fit-test system. With test results in less than 10 seconds per ear, the 3M™ E-A-Rfit™ Validation System generates a personal attenuation rating (PAR) for each worker. Fit, train, and motivate every worker using their Personal Attenuation Rating (PAR). If you're interested in contracting E-A-Rfit services for your workers, the following independent service providers are equipped and trained to meet your needs.

Auditory Disorders and Balance Laboratory, Inc.

Dr. Dennis A. Colucci
Taj Mahal Medical Center
23521 Paseo de Valencia
