Applied to Life.™

3M Traffic Safety and Security

Polyurea. Applied to making roads safer.

3M™ Liquid Pavement Marking Series 5000 are visible and durable pavement markings to keep drivers safe on the road. These cost-effective markings are applied easily and cure quickly to minimize lane closures and help protect road construction workers.

3M™ Liquid Pavement Marking Series 5000

Polyurea liquid pavement markings were invented by 3M in 1999 as a new class of plural component road markings. These markings work to help keep drivers and construction workers safe through higher levels of durability, excellent adhesion, and ease of material handling. Series 5000 is ideal for long-lines, channelizing lines, and gore markings on all common road surface types.

Fewer Traffic Disruptions

Series 5000 can be applied less often because of its increased durability. This means lower life cycle costs for road authorities and fewer interruptions on busy routes that place construction workers and motorists in dangerous driving situations. A longer life cycle also means less frequent maintenance. This keeps traffic flowing so drivers can get where they need to be quickly.

Easy to Apply

As a low viscosity material, Series 5000 remains easy to pump, pour and apply in cold weather. It cures quickly at temperatures as low as 30° Fahrenheit, which extends the striping season in colder climates.

Track Free

Series 5000 is track free in less than two minutes, reducing material cure times on the road. A reduced cure time means less traffic disruption for the motorist and less maintenance time and cost for road authorities.

Maximum Visibility

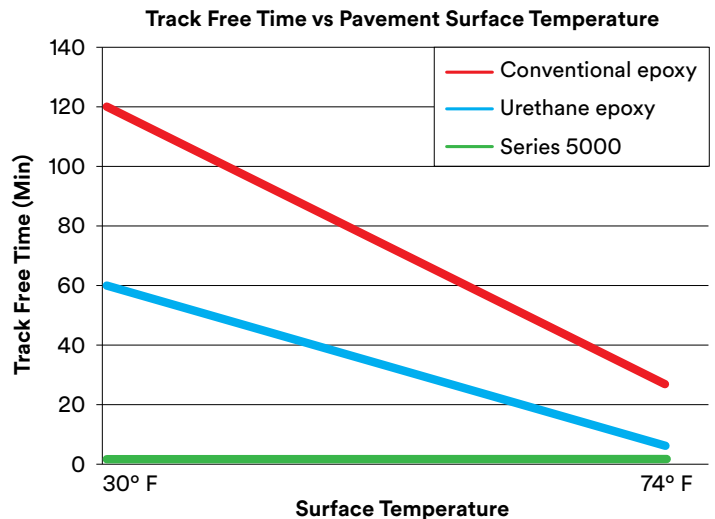

Series 5000 helps drivers to recognize pavement markings at greater distances. This gives drivers more time to react to changes on the road, helping to create a safer and more comfortable driving experience. 3M™ All Weather Elements can be customized to perform in variable weather conditions. Choose from dry, wet or a combination of both elements to help achieve safer roads in any weather conditions.

3M Support

3M is a global company with local support. Our experienced representatives and technicians can show you how to improve roadway visibility and safety, reduce long-term costs, properly apply pavement marking materials, and maintain your roadway marking projects.

3M™ Liquid Pavement Marking Series 5000 with optional 3M™ All Weather Elements.
