The 3M™ Bair Paws™ system is revolutionizing forced-air warming by providing clinicians options for comfort and clinical warming throughout the perioperative process in one convenient gown. When connected to a Bair Paws warming unit, the Bair Paws gown provides clinical prewarming or comfort warming as patients await surgery. In the O.R., the same gown offers clinical warming for select surgical procedures when connected to a 3M™ Bair Hugger™ warming unit. The gown continues to warm in PACU, with both comfort and clinical capabilities.
Only the 3M™ Bair Paws™ system offers patient-adjustable warming with a simple twist, as the unit’s handheld controller allows patients to adjust the temperature of the air flowing through the gown to a level that’s right for them.

The warming unit model 875 is lightweight, simple to use and is placed easily on the wall, bedrail, IV pole or a flat surface.

The Bair Paws warming unit provides:

- The ability to prewarm patients to help in the prevention of unintended hypothermia
- Personalized comfort as patients control the unit’s airflow and temperature (ambient to 43°C)
- Easy “snap-fit” flexibility in mounting the unit on the wall, a bedrail or an IV pole. The unit can also be placed on a flat surface.
- Convenient, built-in hose storage
- Small, lightweight design

Specifications

- **Dimensions**: 13” high x 7.7” wide x 4” deep (33 cm high x 19.6 cm wide x 10.2 cm deep)
- **Weight**: 7.0 lb (3.2 kg)
- **Operating Temperatures**: User adjustable from ambient to 43°C ± 3°C
- **Filter**: Dust filter
- **Device Ratings**: 110-120 VAC, 50/60 Hz, 4.6 A; 220-240 VAC, 50/60 Hz, 2.8 A

Gown Sizes and Configurations

- **Pediatric**: 33” long; 40” sweep
- **Small**: 44” long; 55” sweep
- **Standard**: 51” long; 64” sweep
- **X-Large**: 51” long; 122” sweep
