

3M™ Eyewear Cleaning Products

Product Description

To complement our extensive range of protective eyewear products, 3M offers a number of storage and cleaning solutions to extend the operational life of your chosen model.

3M™ Lens Cleaning Solution is available in a 120ml bottle with a pump action spray. This product provides an effective way to clean your eyewear when working away from running water and other methods of cleaning.

3M™ Disposable Cleaning Station is a wall-mounting card unit that includes a bottle of 3M™ Lens Cleaning Solution and 400 tissues. This is the perfect solution for large workforces.

3M™ Dispenser Cleaning Tissues are pre-moistened with 3M™ Cleaning Solution. Each tissue comes in an individually wrapped sachet to seal-in moisture. These handy sachets can easily be carried in pockets for use in the field.

3M™ Microfibre cloths provide a convenient way to remove dust and smears from lenses without the risk of causing surface scratches. The Microfibre cases also provide safe storage for your spectacles or goggles.

Key Features

- Extend the operational life of your eyewear
- Effective cleaning solutions for a range of work environments

Use Limitation

These products are intended for general-use cleaning of 3M eyewear products and may not be suitable for specific decontamination or disinfection procedures used in your workplace.
