Reference Information

Organization: Mazda North American Operations

Document

Type: Service Bulletin
Name: Door Glass Run Channel Out of Position
Number: 09-020/12
Issued: August 10, 2012

Description

Vehicles: 2013 CX-5
*Includes VINs lower than JM3 KE*****122801 (produced before May 8, 2012)*

Purpose: Some vehicles may experience a front door glass run channel that has slipped out of position causing a poor appearance concern. While the window is open, a person might open or close the door by holding the door sash and cause the door glass run channel to be pulled out of position.

To prevent the glass run channel from slipping out of position, a coating has been applied to the outer surface of the glass run channel to decrease frictional resistance. Customers with this concern should have their vehicle repaired following the steps outlined in this Service Bulletin.

Note: 3M provides this information for REFERENCE ONLY.
ALWAYS refer to the original document or the OEM-provided model-specific collision damage repair manuals for complete instructions.
