

Catch coding compliance errors when and where they happen

The problem:

Currently, as many as 13 state and federal programs are performing audits and reviewing your coding accuracy.

Penalties, write-offs and reduced payments add up. Can your hospital afford to lose even one or two percent net revenue for the services you provided?

Penalties

Write-offs

Increasing
government
scrutiny

Lost
productivity

Do you ever get the feeling that you're coding in a fishbowl?
Does it sometimes seem like the harder you work, the more scrutiny you get?

Reduce compliance risk, rework, rejected bills, and write-offs

Use expanded content for ICD-10

Manage RAC programs and other external audits

Measure with 200+ standard reports

View proprietary/custom edits in real-time or retrospectively

Benchmark against facility, enterprise and national norms with MEDPAR and PEPPER

The solution:

Use the 3M™ Audit Expert System to proactively review 100 percent of inpatient records at the point of coding **before** they are billed.

Now is the time to find out how the 3M Audit Expert System can help streamline your coding compliance program.

Learn more about how the 3M Audit Expert System—**together with your 3M™ Coding and Reimbursement System**—can help you reduce coding compliance risk at www.3Mhis.com/AuditExpert/.
