

DIRECTIONS FOR USE

Use pea-size amount

Brush 2 minutes

Spit

Advantages of Clinpro™ Tooth Crème

- Tooth Crème is low foaming
- Tooth Crème delivers more fluoride to your teeth
- Tooth Crème comes in 2 pleasant flavours - Vanilla mint & Spearmint
- Tooth Crème replaces your regular toothpaste
- Tooth Crème helps to prevent cavities & root surface decay
- Tooth Crème offers gentle & effective cleaning, plus protection

Always read the label and use as directed. Keep out of reach of children under 6 years of age. Repeated swallowing of high levels of fluoride may cause chalk-like, lacy markings on your teeth (dental fluorosis). For this reason, children with baby teeth (developing dentition) require adult supervision to minimise or prevent swallowing of excessive amounts.

Love 2 Smile

3M ESPE

Clinpro™ Tooth Crème 0.21% w/w Sodium Fluoride Anti-Cavity Paste Fights Tooth Decay

Clinpro™ Tooth Crème 0.21% w/w Sodium Fluoride Anti-Cavity Paste contains fluoride and an innovative Tri-Calcium Phosphate ingredient to deliver more fluoride to your teeth than regular tooth paste. Clinpro™ Tooth Crème can revitalise tooth enamel and help remineralise your teeth giving them the nourishment they need to help reverse the damage if decay has started.

Many factors can increase your risk of tooth decay:

- High sugar and carbohydrate diets
- Receding gums
- History of cavities/tooth decay
- Poor oral hygiene
- Orthodontic brackets
- Medications that cause dry mouth

Clinpro Tooth Crème is a breakthrough in anti-cavity protection:

- Helps strengthen teeth to protect them from decay
- Helps reduce root cavities
- Contains a mild abrasive that gently removes stains to help clean and whiten your teeth

Important Patient Information

What is Clinpro Tooth Crème 0.21% w/w Sodium Fluoride Anti-Cavity Paste?

Clinpro Tooth Crème contains fluoride as well as calcium and phosphate, which are components naturally found in saliva. It is used to prevent tooth decay and can be used in place of your usual toothpaste.

How do I use Clinpro Tooth Crème?

- Place a pea-sized amount of Clinpro Tooth Crème on a soft-bristle toothbrush and brush teeth for at least two minutes.
- After brushing, spit out. Rinsing is optional - please check with your dental professional.
- Use twice daily or as directed by your dental professional.
- The optimum time to brush with Clinpro Tooth Crème is first thing in the morning and just prior to going to sleep.

Children under 6 years of age:

- To be used only on the advice of a dental professional.
- Clinpro Tooth Crème should only be used under direct adult supervision.
- Use only a pea-sized amount.
- After brushing
 - >> Spit out and rinse thoroughly with water.
- Do not swallow.
- Use twice daily or as directed by your dental professional.
- The optimum time to brush with Clinpro Tooth Crème is first thing in the morning and just prior to going to sleep.
