Filtek™ Bulk Fill
Posterior Restorative

One
and done.
Fast and easy

One increment up to 5 mm.
No expensive dispensing devices or time-consuming layers.
Posterior Restorations made simple.

There’s no question that bulk fill materials save time, however, true simplification involves eliminating complicated expensive dispensing devices, additional layers and multiple steps, without compromising wear resistance or stress relief.

Filtek™ Bulk Fill Posterior Restorative is your one-step bulk placement solution designed to improve productivity by allowing fast and easy posterior restorations.

- One-step placement, no additional capping layer
- Fast and easy procedure
- Excellent adaptation without additional expensive dispensing devices
- Stress relief to enable up to 5 mm depth of cure
- Better in vitro wear resistance than market-leading bulk fill materials
- Excellent handling and sculptability
- TRUE nanofiller technology and two innovative methacrylate monomers act to lower polymerization stress without compromising wear

Filtek™ Bulk Fill Posterior Restorative

It’s as simple as “one and done.”

One Bulk Fill Placement up to 5 mm
10 sec. light cure x 3 (occlusal, buccal, lingual)
Dentists were asked to place and cure different restorations and rate the materials based on preference.

In a simulated operatory setting, we put Filtek Bulk Fill Posterior Restorative head-to-head against several restorative materials that require different placement techniques. The materials included an incrementally placed composite and a flowable bulk fill composite.

Filtek Bulk Fill Posterior Restorative stands out over the competition.

24% faster placement time vs incrementally placed composite

2X number of dentists prefer Filtek™ Bulk Fill Posterior Restorative vs a bulk fill flowable based on placement technique

TRUE nanofiller technology and innovative chemistry

Filtek Bulk Fill Posterior Restorative uses the same TRUE nanofiller technology that’s been time-proven by other leading Filtek™ restorative products. Not only does this technology contribute to high strength, excellent handling and better wear resistance, but also to restorations that are fast and easy to polish.

In addition to this TRUE nanofiller technology, Filtek Bulk Fill Posterior Restorative also contains two innovative methacrylate monomers that, in combination, act to lower polymerization stress, without compromising wear.

The combination of these two technologies results in an easy-to-use, one-step placement, restorative material designed to simplify your posterior restorations.
Also from the brand you trust ...  

**Filtek™ Bulk Fill**  
Flowable Restorative

An excellent low-stress liner/base solution.

If you’re looking for a great, all-around, low-stress bulk fill flowable, this is it. Filtek™ Bulk Fill Flowable Restorative is up to 50% stronger than the leading bulk fill flowable1—and offers over 3X the wear resistance.1 Excellent for use as2:

- a liner for Class I and Class II restorations
- a fast bulk fill base up to 4 mm for Class I and Class II restorations
- as a wear-resistant solution for small, non stress-bearing occlusal surfaces, Class III and Class V
