Filtek™ Bulk Fill
Flowable Restorative

The bulk fill flowable
that’s fast and strong.
Filtek™ Bulk Fill
Flowable Restorative

Reduce procedure time and increase your confidence with this bulk fill flowable.

With the trend toward faster and easier procedures, you have more choices than ever for a flowable composite. So how do you choose the one that stands up to your needs and expectations for efficiency, strength and all-around reliable performance?

Rely on the reputation of a leading innovator of dental restorative solutions … 3M ESPE.

Excellent as a liner
Flowable composites are designed to adapt easily, reducing the chance for voids and providing a good marginal seal to reduce the risk of post-operative sensitivity. These benefits are likely why 75% of dentists surveyed use a flowable composite as a liner.¹

Very Low
polymerization stress
compared to traditional flowables placed and cured in 2mm increments²

Easy cavity adaptation

² Compared to Grandio Flow, TPH3 Flow, Premise Flowable, Revolution Formula 2, EsthetX Flow and Tetric EvoFlow. Source: 3M ESPE internal data.
Excellent as a time-saving bulk fill base in deep restorations

Filtek Bulk Fill Flowable Restorative is formulated for low stress and an increased depth of cure, so it can be placed with confidence in one convenient 4 mm increment. The restoration is then completed with a minimum 2 mm thickness of a posterior or universal composite such as Filtek™ Supreme Ultra Universal Restorative.

---

Less shrinkage stress than more highly filled, sculptable composites

Up to 4mm depth of cure so it can be placed with confidence in one convenient increment as a bulk fill base

Up to 50% stronger than the leading bulk fill flowable

Highly Radiopaque

Compared to traditional flowables and other bulk fill flowables

Excellent for surface restorations

High strength and excellent wear resistance make it a versatile solution for surface restorations including small, non-stress bearing occlusal restorations.

Over 3X the wear resistance of the leading bulk fill flowable

Choose Filtek™ Bulk Fill Flowable Restorative for fast and simple posterior restorations.

1. Prepare the tooth and apply adhesive.

2. Dispense up to 4 mm of Filtek™ Bulk Fill Flowable Restorative into the prepared cavity and cure.

3. Place a 2 mm (minimum) capping layer of an esthetic composite, such as a Filtek™ universal restorative, and cure.
