Copying and/or downloading of this information for the purpose of properly utilizing 3M products is allowed provided that: (1) the information is copied in full with no changes unless prior written agreement is obtained from 3M, and (2) neither the copy nor the original is resold or otherwise distributed with the intention of earning a profit thereon.

| Document group: | 10-2685-5  | Version number:  | 18.01      |
|-----------------|------------|------------------|------------|
| Issue Date:     | 2023/03/28 | Supercedes Date: | 2022/10/06 |

This Safety Data Sheet has been prepared in accordance with the Canadian Hazardous Products Regulations.

| SECTION 1: Identification |
|---------------------------|
|                           |

#### 1.1. Product identifier

... . ..

3M<sup>™</sup> Neoprene Contact Adhesive 10, Light Yellow

| Product Identificati | on Numbers     |                |                |                |
|----------------------|----------------|----------------|----------------|----------------|
| 62-2166-5320-4       | 62-2166-5520-9 | 62-2166-6520-8 | 62-2166-6530-7 | 62-2166-7520-7 |
| 62-2166-8520-6       | 62-2166-9520-5 | 62-2166-9535-3 | AS-0105-9121-7 | UU-0125-1345-1 |
| XD-0055-2979-2       |                |                |                |                |

#### 1.2. Recommended use and restrictions on use

**Intended Use** Industrial use

**Restrictions on use** Adhesive

#### 1.3. Supplier's details

| Company:   | 3M Canada Company  |         |
|------------|--|---------|
| Division:  | Industrial Adhesives and Tapes Division                        |         |
| Address:   | 1840 Oxford Street East, Post Office Box 5757, London, Ontario | N6A 4T1 |
| Telephone: | (800) 364-3577   |         |
| Website:   | www.3M.ca  |         |

#### 1.4. Emergency telephone number

Medical Emergency Telephone:1-800-3M HELPS / 1-800-364-3577; Transportation Emergency Telephone (CANUTEC): (613) 996-6666

# **SECTION 2: Hazard identification**

## 2.1. Classification of the substance or mixture

Flammable Liquid: Category 2. Serious Eye Damage/Irritation: Category 2A. Skin Corrosion/Irritation: Category 2. Reproductive Toxicity: Category 1B. Carcinogenicity: Category 2. Specific Target Organ Toxicity (single exposure): Category 3. Specific Target Organ Toxicity (repeated exposure): Category 1.

2.2. Label elements Signal word

Danger

Symbols

Flame | Exclamation mark | Health Hazard |

Pictograms

#### Hazard statements

Highly flammable liquid and vapour.

Causes serious eye irritation. Causes skin irritation. May cause drowsiness or dizziness. May damage fertility or the unborn child. Suspected of causing cancer.

Causes damage to organs through prolonged or repeated exposure: nervous system | sensory organs |

#### **Precautionary statements**

#### **Prevention:**

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Ground and bond container and receiving equipment. Use non-sparking tools. Take action to prevent static discharges. Keep container tightly closed. Use explosion-proof electrical/ventilating/lighting equipment. Do not breathe dust/fume/gas/mist/vapours/spray. Use only outdoors or in a well-ventilated area. Wear protective gloves and eye/face protection. Do not eat, drink or smoke when using this product. Wash exposed skin thoroughly after handling.

#### **Response:**

IF INHALED: Remove person to fresh air and keep comfortable for breathing. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. IF exposed or concerned: Get medical advice/attention. In case of fire: Use a fire fighting agent suitable for flammable liquids such as dry chemical or carbon dioxide to extinguish.

#### Storage:

Store in a well-ventilated place. Keep cool. Store locked up.

## **Disposal:**

Dispose of contents/container in accordance with applicable local/regional/national/international regulations.

#### 2.3. Other hazards

None known.

10% of the mixture consists of ingredients of unknown acute inhalation toxicity.

# **SECTION 3: Composition/information on ingredients**

This material is a mixture.

| Ingredient   | C.A.S. No. | % by Wt                | Common Name  |
|--|------------|------------------------|--|
| Petroleum Distillates                                | 64741-84-0 | 30 - 60 Trade Secret * | Naphtha, petroleum, solvent-refined light a<br>solvent extraction process. It consists<br>predominantly of aliphatic hydrocarbons<br>having carbon numbers predominantly in<br>the range of C5 through C11 and boiling in<br>the range of approximately 35.degree.C to<br>190.degree.C |
| Acetone  | 67-64-1    | 10 - 30 Trade Secret * | 2-Propanone  |
| Hexane   | 110-54-3   | 7 - 30 Trade Secret *  | Hexane   |
| Toluene  | 108-88-3   | 7 - 30 Trade Secret *  | No Data Available  |
| Heptane  | 142-82-5   | 4 - 15                 | Heptane  |
| Magnesium Resinate                                   | 68037-42-3 | 7 - 13                 | Formaldehyde, polymer with 4-(1,1-<br>dimethylethyl)phenol, magnesium oxide<br>complex   |
| 2-CHLORO-1,3-BUTADIENE<br>POLYMERS AND<br>COPOLYMERS | None       | 5 - 10                 | Not Applicable   |
| Polychloroprene                                      | 9010-98-4  | 5 - 10                 | 1,3-Butadiene, 2-chloro-, homopolymer  |
| P-TERT-BUTYLPHENOL-<br>FORMALDEHYDE RESIN            | 25085-50-1 | 5 - 10                 | Formaldehyde, polymer with 4-(1,1-<br>dimethylethyl)phenol   |
| 2-Methylpentane                                      | 107-83-5   | 3 - 8                  | Pentane, 2-methyl-   |
| 3-Methylpentane                                      | 96-14-0    | 3 - 8                  | Pentane, 3-methyl-   |
| Cyclohexane  | 110-82-7   | < 5                    | Cyclohexane  |
| Magnesium Oxide                                      | 1309-48-4  | < 5                    | Magnesium oxide (MgO)  |
| Zinc Oxide   | 1314-13-2  | < 1                    | Zinc oxide (ZnO)   |
| Ethylbenzene   | 100-41-4   | < 0.5                  | Benzene, ethyl-  |
| Methyl Alcohol                                       | 67-56-1    | < 0.5                  | Methanol   |

2-CHLORO-1,3-BUTADIENE POLYMERS AND COPOLYMERS is a non-hazardous Trade Secret material according to WHMIS criteria.

Ethylbenzene is a hazardous Trade Secret material according to WHMIS criteria. Refer to Section 15 for further information.

\*The actual concentration of this ingredient has been withheld as a trade secret.

# **SECTION 4: First aid measures**

## 4.1. Description of first aid measures

#### Inhalation:

Remove person to fresh air. If you feel unwell, get medical attention.

#### **Skin Contact:**

Immediately wash with soap and water. Remove contaminated clothing and wash before reuse. If signs/symptoms develop, get medical attention.

## **Eye Contact:**

Immediately flush with large amounts of water. Remove contact lenses if easy to do. Continue rinsing. Get medical attention.

#### If Swallowed:

Rinse mouth. If you feel unwell, get medical attention.

## 4.2. Most important symptoms and effects, both acute and delayed

Central nervous system depression (headache, dizziness, drowsiness, incoordination, nausea, slurred speech, giddiness, and unconsciousness). Target organ effects following prolonged or repeated exposure. See Section 11 for additional details.

## 4.3. Indication of any immediate medical attention and special treatment required

Not applicable

# **SECTION 5: Fire-fighting measures**

## 5.1. Suitable extinguishing media

In case of fire: Use a fire fighting agent suitable for flammable liquids such as dry chemical or carbon dioxide to extinguish.

## 5.2. Special hazards arising from the substance or mixture

Closed containers exposed to heat from fire may build pressure and explode.

## Hazardous Decomposition or By-Products

| Substance                 | <b>Condition</b>  |
|---------------------------|-------------------|
| Aldehydes                 | During Combustion |
| Hydrocarbons              | During Combustion |
| Carbon monoxide           | During Combustion |
| Carbon dioxide            | During Combustion |
| Hydrogen Chloride         | During Combustion |
| Irritant Vapours or Gases | During Combustion |

## 5.3. Special protective actions for fire-fighters

Water may not effectively extinguish fire; however, it should be used to keep fire-exposed containers and surfaces cool and prevent explosive rupture. Wear full protective clothing, including helmet, self-contained, positive pressure or pressure demand breathing apparatus, bunker coat and pants, bands around arms, waist and legs, face mask, and protective covering for exposed areas of the head.

## **SECTION 6: Accidental release measures**

## 6.1. Personal precautions, protective equipment and emergency procedures

Evacuate area. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Use only non-sparking tools. Ventilate the area with fresh air. For large spill, or spills in confined spaces, provide mechanical ventilation to disperse or exhaust vapours, in accordance with good industrial hygiene practice. Warning! A motor could be an ignition source and could cause flammable gases or vapours in the spill area to burn or explode. Refer to other sections of this SDS for information regarding physical and health hazards, respiratory protection, ventilation, and personal protective equipment.

## **6.2.** Environmental precautions

Avoid release to the environment. For larger spills, cover drains and build dikes to prevent entry into sewer systems or bodies of water.

## 6.3. Methods and material for containment and cleaning up

Contain spill. Cover spill area with a fire-extinguishing foam. Working from around the edges of the spill inward, cover with bentonite, vermiculite, or commercially available inorganic absorbent material. Mix in sufficient absorbent until it appears dry. Remember, adding an absorbent material does not remove a physical, health, or environmental hazard. Collect as much of the spilled material as possible using non-sparking tools. Place in a metal container approved for transportation by appropriate authorities. Clean up residue with an appropriate solvent selected by a qualified and authorized person. Ventilate the area with fresh air. Read and follow safety precautions on the solvent label and SDS. Seal the container. Dispose of collected material as soon as possible in accordance with applicable local/regional/national/international regulations.

# **SECTION 7: Handling and storage**

## 7.1. Precautions for safe handling

For industrial or professional use only. Not for consumer sale or use. Do not handle until all safety precautions have been

read and understood. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Use only non-sparking tools. Take precautionary measures against static discharge. Do not breathe dust/fume/gas/mist/vapours/spray. Do not get in eyes, on skin, or on clothing. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Avoid release to the environment. Avoid contact with oxidizing agents (eg. chlorine, chromic acid etc.) Wear low static or properly grounded shoes. Use personal protective equipment (gloves, respirators, etc.) as required. To minimize the risk of ignition, determine applicable electrical classifications for the process using this product and select specific local exhaust ventilation equipment to avoid flammable vapor accumulation. Ground/bond container and receiving equipment if there is potential for static electricity accumulation during transfer.

## 7.2. Conditions for safe storage including any incompatibilities

Store in a well-ventilated place. Keep cool. Keep container tightly closed. Store away from heat. Store away from acids. Store away from oxidizing agents.

# **SECTION 8: Exposure controls/personal protection**

## 8.1. Control parameters

## **Occupational exposure limits**

If a component is disclosed in section 3 but does not appear in the table below, an occupational exposure limit is not available for the component.

| Ingredient      | C.A.S. No. | Agency | Limit type                 | <b>Additional Comments</b>     |
|-----------------|------------|--------|----------------------------|--------------------------------|
| Ethylbenzene    | 100-41-4   | ACGIH  | TWA:20 ppm                 |                                |
| 2-Methylpentane | 107-83-5   | ACGIH  | TWA:500 ppm;STEL:1000      |                                |
|                 |            |        | ppm                        |                                |
| Toluene         | 108-88-3   | ACGIH  | TWA:20 ppm                 |                                |
| Hexane          | 110-54-3   | ACGIH  | TWA:50 ppm                 | Danger of cutaneous absorption |
| Cyclohexane     | 110-82-7   | ACGIH  | TWA:100 ppm                |                                |
| Magnesium Oxide | 1309-48-4  | ACGIH  | TWA(inhalable fraction):10 |                                |
| -               |            |        | mg/m3                      |                                |

|                 |            |        | mg/m3;STEL(respirable      |                                |
|                 |            |        | fraction):10 mg/m3         |                                |
| Heptane         | 142-82-5   | ACGIH  | TWA:400 ppm;STEL:500 ppm   |                                |
| Methyl Alcohol  | 67-56-1    | ACGIH  | TWA:200 ppm;STEL:250 ppm   | Danger of cutaneous absorption |
| Acetone         | 67-64-1    | ACGIH  | TWA:250 ppm;STEL:500 ppm   |                                |
| 3-Methylpentane | 96-14-0    | ACGIH  | TWA:500 ppm;STEL:1000      |                                |
|                 |            |        | ppm                        |                                |

ACGIH : American Conference of Governmental Industrial Hygienists

AIHA : American Industrial Hygiene Association

CMRG : Chemical Manufacturer's Recommended Guidelines

TWA: Time-Weighted-Average

STEL: Short Term Exposure Limit

CEIL: Ceiling

## 8.2. Exposure controls

## 8.2.1. Engineering controls

Use general dilution ventilation and/or local exhaust ventilation to control airborne exposures to below relevant Exposure Limits and/or control dust/fume/gas/mist/vapours/spray. If ventilation is not adequate, use respiratory protection equipment. Use explosion-proof ventilation equipment.

## 8.2.2. Personal protective equipment (PPE)

## Eye/face protection

Select and use eye/face protection to prevent contact based on the results of an exposure assessment. The following eye/face protection(s) are recommended: Safety Glasses with side shields Indirect Vented Goggles

**Skin/hand protection** 

Select and use gloves and/or protective clothing approved to relevant local standards to prevent skin contact based on the results of an exposure assessment. Selection should be based on use factors such as exposure levels, concentration of the substance or mixture, frequency and duration, physical challenges such as temperature extremes, and other use conditions. Consult with your glove and/or protective clothing manufacturer for selection of appropriate compatible gloves/protective clothing. Note: Nitrile gloves may be worn over polymer laminate gloves to improve dexterity. Gloves made from the following material(s) are recommended: Polymer laminate

## **Respiratory protection**

An exposure assessment may be needed to decide if a respirator is required. If a respirator is needed, use respirators as part of a full respiratory protection program. Based on the results of the exposure assessment, select from the following respirator type(s) to reduce inhalation exposure:

Half facepiece or full facepiece air-purifying respirator suitable for organic vapours and particulates

Half facepiece or full facepiece supplied-air respirator

Organic vapor respirators may have short service life.

For questions about suitability for a specific application, consult with your respirator manufacturer.

# **SECTION 10: Stability and reactivity**

## 10.1. Reactivity

This material may be reactive with certain agents under certain conditions - see the remaining headings in this section.

# 10.2. Chemical stability

Stable.

## 10.3. Possibility of hazardous reactions

Hazardous polymerization will not occur.

# 10.4. Conditions to avoid

Heat Sparks and/or flames

# 10.5. Incompatible materials

Strong oxidizing agents

## 10.6. Hazardous decomposition products

<u>Substance</u>

## None known.

Refer to section 5.2 for hazardous decomposition products during combustion.

# **SECTION 11: Toxicological information**

The information below may not be consistent with the material classification in Section 2 if specific ingredient classifications are mandated by a competent authority. In addition, toxicological data on ingredients may not be reflected in the material classification and/or the signs and symptoms of exposure, because an ingredient may be present below the threshold for labeling, an ingredient may not be available for exposure, or the data may not be relevant to the material as a whole.

11.1. Information on Toxicological effects

Signs and Symptoms of Exposure

## Based on test data and/or information on the components, this material may produce the following health effects:

## Inhalation:

Respiratory Tract Irritation: Signs/symptoms may include cough, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain. May cause additional health effects (see below).

## Skin Contact:

Skin Irritation: Signs/symptoms may include localized redness, swelling, itching, dryness, cracking, blistering, and pain. Allergic Skin Reaction (non-photo induced) in sensitive people: Signs/symptoms may include redness, swelling, blistering, and itching. May cause additional health effects (see below).

## Eye Contact:

Severe Eye Irritation: Signs/symptoms may include significant redness, swelling, pain, tearing, cloudy appearance of the cornea, and impaired vision.

## Ingestion:

## **Condition**

Gastrointestinal Irritation: Signs/symptoms may include abdominal pain, stomach upset, nausea, vomiting and diarrhea. May cause additional health effects (see below).

## **Additional Health Effects:**

## Single exposure may cause target organ effects:

Central Nervous System (CNS) Depression: Signs/symptoms may include headache, dizziness, drowsiness, incoordination, nausea, slowed reaction time, slurred speech, giddiness, and unconsciousness.

### Prolonged or repeated exposure may cause target organ effects:

Ocular Effects: Signs/symptoms may include blurred or significantly impaired vision. Auditory Effects: Signs/symptoms may include hearing impairment, balance dysfunction and ringing in the ears. Peripheral Neuropathy: Signs/symptoms may include tingling or numbness of the extremities, incoordination, weakness of the hands and feet, tremors and muscle atrophy. Olfactory Effects: Signs/symptoms may include decreased ability to detect odours and/or complete loss of smell. Neurological Effects: Signs/symptoms may include personality changes, lack of coordination, sensory loss, tingling or numbness of the extremities, weakness, tremors, and/or changes in blood pressure and heart rate.

## **Reproductive/Developmental Toxicity:**

Contains a chemical or chemicals which can cause birth defects or other reproductive harm.

#### **Carcinogenicity:**

Contains a chemical or chemicals which can cause cancer.

| Ingredient   | CAS No.  | Class Description             | Regulation                                  |
|--------------|----------|-------------------------------|---|
| Ethylbenzene | 100-41-4 | Grp. 2B: Possible human carc. | International Agency for Research on Cancer |

#### **Toxicological Data**

If a component is disclosed in section 3 but does not appear in a table below, either no data are available for that endpoint or the data are not sufficient for classification.

### Acute Toxicity

| Name                  | Route                             | Species | Value  |
|-----------------------|-----------------------------------|---------|--|
| Overall product       | Dermal                            |         | No data available; calculated ATE >5,000 mg/kg |
| Overall product       | Inhalation-<br>Vapor(4 hr)        |         | No data available; calculated ATE >50 mg/l     |
| Overall product       | Ingestion                         |         | No data available; calculated ATE >5,000 mg/kg |
| Petroleum Distillates | Dermal                            | Rat     | LD50 > 2,800 mg/kg                             |
| Petroleum Distillates | Inhalation-<br>Vapor (4<br>hours) | Rat     | LC50 > 25.2 mg/l                               |
| Petroleum Distillates | Ingestion                         | Rat     | LD50 > 5,840 mg/kg                             |

## **Aspiration Hazard**

| Name                  | Value             |  |
|-----------------------|-------------------|--|
| Petroleum Distillates | Aspiration hazard |  |
| Hexane                | Aspiration hazard |  |
| Heptane               | Aspiration hazard |  |
| Toluene               | Aspiration hazard |  |
| 2-Methylpentane       | Aspiration hazard |  |
| 3-Methylpentane       | Aspiration hazard |  |
| Cyclohexane           | Aspiration hazard |  |
| Ethylbenzene          | Aspiration hazard |  |

Please contact the address or phone number listed on the first page of the SDS for additional toxicological information on this material and/or its components.

# **SECTION 12: Ecological information**

No data available.

# **SECTION 13: Disposal considerations**

## 13.1. Disposal methods

Dispose of contents/ container in accordance with the local/regional/national/international regulations.

Incinerate in a permitted waste incineration facility. Combustion products will include halogen acid (HCl/HF/HBr). Facility must be capable of handling halogenated materials. As a disposal alternative, utilize an acceptable permitted waste disposal facility. Empty drums/barrels/containers used for transporting and handling hazardous chemicals (chemical substances/mixtures/preparations classified as Hazardous as per applicable regulations) shall be considered, stored, treated & disposed of as hazardous wastes unless otherwise defined by applicable waste regulations. Consult with the respective regulating authorities to determine the available treatment and disposal facilities.

# **SECTION 14: Transport Information**

# **SECTION 16: Other information**

National Fire Protection Association (NFPA) hazard ratings are designed for use by emergency response personnel to address the hazards that are presented by short-term, acute exposure to a material under conditions of fire, spill, or similar emergencies. Hazard ratings are primarily based on the inherent physical and toxic properties of the material but also include the toxic properties of combustion or decomposition products that are known to be generated in significant quantities.

Health: 2 Flammability: 3 Instability: 0 Special Hazards: None
