

## Safety Data Sheet

Copyright,2021, 3M Canada Company. All rights reserved. Copying and/or downloading of this information for the purpose of properly utilizing 3M products is allowed provided that: (1) the information is copied in full with no changes unless prior written agreement is obtained from 3M, and (2) neither the copy nor the original is resold or otherwise distributed with the intention of earning a profit thereon.

|                        |            |                         |            |
|------------------------|------------|-------------------------|------------|
| <b>Document group:</b> | 25-3522-7  | <b>Version number:</b>  | 7.00       |
| <b>Issue Date:</b>     | 2021/04/09 | <b>Supersedes Date:</b> | 2020/10/21 |

This Safety Data Sheet has been prepared in accordance with the Canadian Hazardous Products Regulations.

### SECTION 1: Identification

#### 1.1. Product identifier

3M™ Super Trim Adhesive, PN 08090

#### Product Identification Numbers

60-4550-3687-5      60-4550-5561-0      60-4550-8986-6      CS-0406-7345-4

#### 1.2. Recommended use and restrictions on use

##### Intended Use

Automotive

##### Specific Use

Adhesive Aerosol

##### Restrictions on use

Not applicable

#### 1.3. Supplier's details

|                   |  |
|-------------------|--|
| <b>Company:</b>   | 3M Canada Company  |
| <b>Division:</b>  | Automotive Aftermarket   |
| <b>Address:</b>   | 1840 Oxford Street East, Post Office Box 5757, London, Ontario N6A 4T1 |
| <b>Telephone:</b> | (800) 364-3577   |
| <b>Website:</b>   | www.3M.ca  |

#### 1.4. Emergency telephone number

Medical Emergency Telephone:1-800-3M HELPS / 1-800-364-3577; Transportation Emergency Telephone (CANUTEC): (613) 996-6666

### SECTION 2: Hazard identification

#### 2.1. Classification of the substance or mixture

Flammable Aerosol: Category 1.  
Gas Under Pressure: Liquefied gas.  
Serious Eye Damage/Irritation: Category 2B.  
Reproductive Toxicity: Category 1B.  
Simple Asphyxiant.

Specific Target Organ Toxicity (single exposure): Category 3.  
Specific Target Organ Toxicity (repeated exposure): Category 1.

## 2.2. Label elements

### Signal word

Danger

### Symbols

Flame | Gas cylinder | Exclamation mark | Health Hazard |

### Pictograms

### Hazard statements

Extremely flammable aerosol. Contains gas under pressure; may explode if heated.  
Causes eye irritation. May cause respiratory irritation. May cause drowsiness or dizziness. May damage fertility or the unborn child. May displace oxygen and cause rapid suffocation.

Causes damage to organs through prolonged or repeated exposure: nervous system | sensory organs |

### Precautionary statements

#### General:

Keep out of reach of children.

#### Prevention:

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Do not breathe dust/fume/gas/mist/vapours/spray. Use only outdoors or in a well-ventilated area. Wear protective gloves. Do not eat, drink or smoke when using this product. Wash exposed skin thoroughly after handling.

#### Response:

IF INHALED: Remove person to fresh air and keep comfortable for breathing. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. IF exposed or concerned: Get medical advice/attention.

#### Storage:

Protect from sunlight. Do not expose to temperatures exceeding 50C/122F. Store in a well-ventilated place. Keep container tightly closed. Store locked up.

#### Disposal:

Dispose of contents/container in accordance with applicable local/regional/national/international regulations.

## 2.3. Other hazards

None known.

2% of the mixture consists of ingredients of unknown acute oral toxicity.  
4% of the mixture consists of ingredients of unknown acute dermal toxicity.  
4% of the mixture consists of ingredients of unknown acute inhalation toxicity.

## SECTION 3: Composition/information on ingredients

This material is a mixture.

| Ingredient   | C.A.S. No.   | % by Wt                | Common Name                            |
|--|--------------|------------------------|--|
| Methyl Acetate   | 79-20-9      | 30 - 40 Trade Secret * | Acetic acid, methyl ester              |
| Dimethyl Ether   | 115-10-6     | 25 - 35 Trade Secret * | Methane, oxybis-                       |
| Cyclohexane  | 110-82-7     | 10 - 20 Trade Secret * | Cyclohexane                            |
| Thermoplastic Rubbers  | Trade Secret | 7 - 13                 | Not Applicable                         |
| Non-Hazardous Components   | Trade Secret | 1 - 10                 | Not Applicable                         |
| Polychloroprene  | Trade Secret | 1 - 10                 | Not Applicable                         |
| Toluene  | 108-88-3     | 3 - 7 Trade Secret *   | No Data Available                      |
| Antioxidant  | Trade Secret | 1 - 5                  | Not Applicable                         |
| Benzene, ethenyl-, polymer with 1,3-butadiene and 2-methyl-1,3-butadiene, hydrogenated | Trade Secret | 1 - 5                  | Not Applicable                         |
| Hydrotreated Heavy Naphtha (Petroleum)   | 64742-48-9   | 1 - 5                  | Naphtha, petroleum, hydrotreated heavy |
| Methylene Chloride   | 75-09-2      | < 0.001                | Methane, dichloro-                     |

Polychloroprene is a non-hazardous Trade Secret material according to WHMIS criteria.

Non-Hazardous Components is a non-hazardous Trade Secret material according to WHMIS criteria.

Thermoplastic Rubbers is a non-hazardous Trade Secret material according to WHMIS criteria.

Antioxidant is a non-hazardous Trade Secret material according to WHMIS criteria.

Benzene, ethenyl-, polymer with 1,3-butadiene and 2-methyl-1,3-butadiene, hydrogenated is a non-hazardous Trade Secret material according to WHMIS criteria.

\*The actual concentration of this ingredient has been withheld as a trade secret.

## SECTION 4: First aid measures

### 4.1. Description of first aid measures

#### Inhalation:

Remove person to fresh air. If you feel unwell, get medical attention.

#### Skin Contact:

Wash with soap and water. If signs/symptoms develop, get medical attention.

#### Eye Contact:

Flush with large amounts of water. Remove contact lenses if easy to do. Continue rinsing. If signs/symptoms persist, get medical attention.

#### If Swallowed:

Rinse mouth. If you feel unwell, get medical attention.

### 4.2. Most important symptoms and effects, both acute and delayed

Irritating to the respiratory tract (coughing, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain). Central nervous system depression (headache, dizziness, drowsiness, incoordination, nausea, slurred speech, giddiness, and unconsciousness). Target organ effects following prolonged or repeated exposure. See Section 11 for additional details.

### 4.3. Indication of any immediate medical attention and special treatment required

Not applicable

## SECTION 5: Fire-fighting measures

### 5.1. Suitable extinguishing media

Use a fire fighting agent suitable for the surrounding fire.

### 5.2. Special hazards arising from the substance or mixture

Closed containers exposed to heat from fire may build pressure and explode.

### Hazardous Decomposition or By-Products

| <u>Substance</u> | <u>Condition</u>  |
|------------------|-------------------|
| Formaldehyde     | During Combustion |
| Carbon monoxide  | During Combustion |
| Carbon dioxide   | During Combustion |

### 5.3. Special protective actions for fire-fighters

Water may not effectively extinguish fire; however, it should be used to keep fire-exposed containers and surfaces cool and prevent explosive rupture.

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Evacuate area. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Use only non-sparking tools. Ventilate the area with fresh air. Warning! A motor could be an ignition source and could cause flammable gases or vapours in the spill area to burn or explode. Refer to other sections of this SDS for information regarding physical and health hazards, respiratory protection, ventilation, and personal protective equipment.

### 6.2. Environmental precautions

Avoid release to the environment.

### 6.3. Methods and material for containment and cleaning up

If possible, seal leaking container. Place leaking containers in a well-ventilated area, preferably an operating exhaust hood, or if necessary outdoors on an impermeable surface until appropriate packaging for the leaking container or its contents is available. Contain spill. Cover spill area with a fire-extinguishing foam. Working from around the edges of the spill inward, cover with bentonite, vermiculite, or commercially available inorganic absorbent material. Mix in sufficient absorbent until it appears dry. Remember, adding an absorbent material does not remove a physical, health, or environmental hazard. Collect as much of the spilled material as possible using non-sparking tools. Place in a metal container approved for transportation by appropriate authorities. Clean up residue with an appropriate solvent selected by a qualified and authorized person. Ventilate the area with fresh air. Read and follow safety precautions on the solvent label and SDS. Seal the container. Dispose of collected material as soon as possible in accordance with applicable local/regional/national/international regulations.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

Do not use in a confined area with minimal air exchange. Keep out of reach of children. Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Do not breathe dust/fume/gas/mist/vapours/spray. Do not get in eyes, on skin, or on clothing. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Avoid contact with oxidizing agents (eg. chlorine, chromic acid etc.) Use personal protective equipment (gloves, respirators, etc.) as required.

### 7.2. Conditions for safe storage including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Protect from sunlight. Do not expose to temperatures exceeding 50C/122F. Store away from heat. Store away from acids. Store away from oxidizing agents.

## SECTION 8: Exposure controls/personal protection

## 8.1. Control parameters

### Occupational exposure limits

If a component is disclosed in section 3 but does not appear in the table below, an occupational exposure limit is not available for the component.

| Ingredient         | C.A.S. No. | Agency | Limit type                            | Additional Comments |
|--------------------|------------|--------|---------------------------------------|---------------------|
| Toluene            | 108-88-3   | ACGIH  | TWA:20 ppm                            |                     |
| Cyclohexane        | 110-82-7   | ACGIH  | TWA:100 ppm                           |                     |
| Dimethyl Ether     | 115-10-6   | AIHA   | TWA:1880 mg/m <sup>3</sup> (1000 ppm) |                     |
| Methylene Chloride | 75-09-2    | ACGIH  | TWA:50 ppm                            |                     |
| Methyl Acetate     | 79-20-9    | ACGIH  | TWA:200 ppm;STEL:250 ppm              |                     |

ACGIH : American Conference of Governmental Industrial Hygienists

AIHA : American Industrial Hygiene Association

CMRG : Chemical Manufacturer's Recommended Guidelines

TWA: Time-Weighted-Average

STEL: Short Term Exposure Limit

CEIL: Ceiling

## 8.2. Exposure controls

### 8.2.1. Engineering controls

Do not remain in area where available oxygen may be reduced. Use general dilution ventilation and/or local exhaust ventilation to control airborne exposures to below relevant Exposure Limits and/or control dust/fume/gas/mist/vapours/spray. If ventilation is not adequate, use respiratory protection equipment.

### 8.2.2. Personal protective equipment (PPE)

#### Eye/face protection

Select and use eye/face protection to prevent contact based on the results of an exposure assessment. The following eye/face protection(s) are recommended:

Full Face Shield

Indirect Vented Goggles

#### Skin/hand protection

Select and use gloves and/or protective clothing approved to relevant local standards to prevent skin contact based on the results of an exposure assessment. Selection should be based on use factors such as exposure levels, concentration of the substance or mixture, frequency and duration, physical challenges such as temperature extremes, and other use conditions. Consult with your glove and/or protective clothing manufacturer for selection of appropriate compatible gloves/protective clothing. Note: Nitrile gloves may be worn over polymer laminate gloves to improve dexterity.

Gloves made from the following material(s) are recommended: Polymer laminate

#### Respiratory protection

An exposure assessment may be needed to decide if a respirator is required. If a respirator is needed, use respirators as part of a full respiratory protection program. Based on the results of the exposure assessment, select from the following respirator type(s) to reduce inhalation exposure:

Half facepiece or full facepiece air-purifying respirator suitable for organic vapors

Half facepiece or full facepiece supplied-air respirator

For questions about suitability for a specific application, consult with your respirator manufacturer.

## SECTION 9: Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

|                |        |
|----------------|--------|
| Physical state | Liquid |
|----------------|--------|

|  |  |
|--|--|
| <b>Specific Physical Form:</b>                       | Aerosol  |
| <b>Colour</b>  | Amber, Yellow  |
| <b>Odour</b>   | Mild Solvent   |
| <b>Odour threshold</b>                               | <i>No Data Available</i>   |
| <b>pH</b>  | <i>Not Applicable</i>  |
| <b>Melting point/Freezing point</b>                  | <i>Not Applicable</i>  |
| <b>Boiling point</b>                                 | <i>Not Applicable</i>  |
| <b>Flash Point</b>                                   | -41.1 °C   |
| <b>Evaporation rate</b>                              | 1.9 [ <i>Ref Std:ETHER=1</i> ]                                   |
| <b>Flammability (solid, gas)</b>                     | Not Applicable   |
| <b>Flammable Limits(LEL)</b>                         | <i>No Data Available</i>   |
| <b>Flammable Limits(UEL)</b>                         | <i>No Data Available</i>   |
| <b>Vapour Pressure</b>                               | <i>Not Applicable</i>  |
| <b>Vapour Density and/or Relative Vapour Density</b> | >=1 [ <i>Ref Std:AIR=1</i> ]                                     |
| <b>Density</b>                                       | 0.835 g/ml   |
| <b>Relative density</b>                              | 0.835 [ <i>Ref Std:WATER=1</i> ]                                 |
| <b>Water solubility</b>                              | Negligible   |
| <b>Solubility- non-water</b>                         | <i>No Data Available</i>   |
| <b>Partition coefficient: n-octanol/ water</b>       | <i>No Data Available</i>   |
| <b>Autoignition temperature</b>                      | <i>No Data Available</i>   |
| <b>Decomposition temperature</b>                     | <i>No Data Available</i>   |
| <b>Viscosity/Kinematic Viscosity</b>                 | <i>Not Applicable</i>  |
| <b>Volatile Organic Compounds</b>                    | 53.8 % weight [ <i>Test Method:calculated per CARB title 2</i> ] |
| <b>Volatile Organic Compounds</b>                    | 452 g/l [ <i>Test Method:calculated SCAQMD rule 443.1</i> ]      |
| <b>Percent volatile</b>                              | 86.2 % weight [ <i>Test Method:Estimated</i> ]                   |
| <b>VOC Less H2O &amp; Exempt Solvents</b>            | 642 g/l [ <i>Test Method:calculated SCAQMD rule 443.1</i> ]      |

**Nanoparticles**

This material does not contain nanoparticles.

**SECTION 10: Stability and reactivity****10.1. Reactivity**

This material may be reactive with certain agents under certain conditions - see the remaining headings in this section.

**10.2. Chemical stability**

Stable.

**10.3. Possibility of hazardous reactions**

Hazardous polymerization will not occur.

**10.4. Conditions to avoid**

Heat

Sparks and/or flames

**10.5. Incompatible materials**

Strong acids

Strong oxidizing agents

**10.6. Hazardous decomposition products****Substance**

None known.

**Condition**

Refer to section 5.2 for hazardous decomposition products during combustion.

## SECTION 11: Toxicological information

The information below may not be consistent with the material classification in Section 2 if specific ingredient classifications are mandated by a competent authority. In addition, toxicological data on ingredients may not be reflected in the material classification and/or the signs and symptoms of exposure, because an ingredient may be present below the threshold for labeling, an ingredient may not be available for exposure, or the data may not be relevant to the material as a whole.

### 11.1. Information on Toxicological effects

#### Signs and Symptoms of Exposure

Based on test data and/or information on the components, this material may produce the following health effects:

##### Inhalation:

May be harmful if inhaled. Simple Asphyxiation: Signs/symptoms may include increased heart rate, rapid respirations, drowsiness, headache, incoordination, altered judgement, nausea, vomiting, lethargy, seizures, coma, and may be fatal.

Respiratory Tract Irritation: Signs/symptoms may include cough, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain. May cause additional health effects (see below).

##### Skin Contact:

Mild Skin Irritation: Signs/symptoms may include localized redness, swelling, itching, and dryness.

##### Eye Contact:

Moderate Eye Irritation: Signs/symptoms may include redness, swelling, pain, tearing, and blurred or hazy vision.

##### Ingestion:

Gastrointestinal Irritation: Signs/symptoms may include abdominal pain, stomach upset, nausea, vomiting and diarrhea. May cause additional health effects (see below).

#### Additional Health Effects:

##### Single exposure may cause target organ effects:

Central Nervous System (CNS) Depression: Signs/symptoms may include headache, dizziness, drowsiness, incoordination, nausea, slowed reaction time, slurred speech, giddiness, and unconsciousness.

##### Prolonged or repeated exposure may cause target organ effects:

Ocular Effects: Signs/symptoms may include blurred or significantly impaired vision. Auditory Effects: Signs/symptoms may include hearing impairment, balance dysfunction and ringing in the ears. Olfactory Effects: Signs/symptoms may include decreased ability to detect odours and/or complete loss of smell. Neurological Effects: Signs/symptoms may include personality changes, lack of coordination, sensory loss, tingling or numbness of the extremities, weakness, tremors, and/or changes in blood pressure and heart rate.

##### Reproductive/Developmental Toxicity:

Contains a chemical or chemicals which can cause birth defects or other reproductive harm.

##### Carcinogenicity:

| Ingredient         | CAS No. | Class Description             | Regulation                                  |
|--------------------|---------|-------------------------------|---|
| Methylene Chloride | 75-09-2 | Grp. 2A: Probable human carc. | International Agency for Research on Cancer |
| Methylene Chloride | 75-09-2 | Anticipated human carcinogen  | National Toxicology Program Carcinogens     |
| Methylene Chloride | 75-09-2 | Cancer hazard                 | OSHA Carcinogens                            |

**Toxicological Data**

If a component is disclosed in section 3 but does not appear in a table below, either no data are available for that endpoint or the data are not sufficient for classification.

**Acute Toxicity**

| Name                                   | Route                      | Species | Value  |
|--|----------------------------|---------|--|
| Overall product                        | Dermal                     |         | No data available; calculated ATE >5,000 mg/kg |
| Overall product                        | Inhalation-Vapor(4 hr)     |         | No data available; calculated ATE20 - 50 mg/l  |
| Overall product                        | Ingestion                  |         | No data available; calculated ATE >5,000 mg/kg |
| Methyl Acetate                         | Dermal                     | Rat     | LD50 > 2,000 mg/kg                             |
| Methyl Acetate                         | Inhalation-Vapor (4 hours) | Rat     | LC50 > 49 mg/l                                 |
| Methyl Acetate                         | Ingestion                  | Rat     | LD50 > 5,000 mg/kg                             |
| Dimethyl Ether                         | Inhalation-Gas (4 hours)   | Rat     | LC50 164,000 ppm                               |
| Cyclohexane                            | Dermal                     | Rat     | LD50 > 2,000 mg/kg                             |
| Cyclohexane                            | Inhalation-Vapor (4 hours) | Rat     | LC50 > 32.9 mg/l                               |
| Cyclohexane                            | Ingestion                  | Rat     | LD50 6,200 mg/kg                               |
| Toluene                                | Dermal                     | Rat     | LD50 12,000 mg/kg                              |
| Toluene                                | Inhalation-Vapor (4 hours) | Rat     | LC50 30 mg/l                                   |
| Toluene                                | Ingestion                  | Rat     | LD50 5,550 mg/kg                               |
| Polychloroprene                        | Dermal                     |         | LD50 estimated to be > 5,000 mg/kg             |
| Polychloroprene                        | Ingestion                  | Rat     | LD50 > 20,000 mg/kg                            |
| Non-Hazardous Components               | Dermal                     |         | LD50 estimated to be > 5,000 mg/kg             |
| Non-Hazardous Components               | Ingestion                  |         | LD50 estimated to be 2,000 - 5,000 mg/kg       |
| Antioxidant                            | Dermal                     |         | LD50 estimated to be > 5,000 mg/kg             |

| Hydrotreated Heavy Naphtha (Petroleum) | Inhalation-Vapor           |         | LC50 estimated to be 20 - 50 mg/l              |
| Hydrotreated Heavy Naphtha (Petroleum) | Dermal                     | Rabbit  | LD50 > 3,000 mg/kg                             |
| Hydrotreated Heavy Naphtha (Petroleum) | Ingestion                  | Rat     | LD50 > 5,000 mg/kg                             |
| Methylene Chloride                     | Dermal                     | Rat     | LD50 > 2,000 mg/kg                             |
| Methylene Chloride                     | Inhalation-Vapor (4 hours) | Rat     | LC50 63.7 mg/l                                 |
| Methylene Chloride                     | Ingestion                  | Rat     | LD50 1,410 mg/kg                               |

ATE = acute toxicity estimate

**Skin Corrosion/Irritation**

| Name                                   | Species | Value                     |
|--|---------|---------------------------|
| Methyl Acetate                         | Rabbit  | No significant irritation |
| Cyclohexane                            | Rabbit  | Mild irritant             |
| Toluene                                | Rabbit  | Irritant                  |
| Polychloroprene                        | Human   | No significant irritation |
| Hydrotreated Heavy Naphtha (Petroleum) | Rabbit  | Irritant                  |
| Methylene Chloride                     | Rabbit  | Irritant                  |

**Serious Eye Damage/Irritation**

| Name            | Species   | Value                     |
|-----------------|-----------|---------------------------|
| Methyl Acetate  | Rabbit    | Moderate irritant         |
| Cyclohexane     | Rabbit    | Mild irritant             |
| Toluene         | Rabbit    | Moderate irritant         |
| Polychloroprene | Professio | No significant irritation |

|  |                      |                           |
|--|----------------------|---------------------------|
|  | nal<br>judgeme<br>nt |                           |
| Hydrotreated Heavy Naphtha (Petroleum) | Rabbit               | No significant irritation |
| Methylene Chloride                     | Rabbit               | Severe irritant           |

### Skin Sensitization

| Name                                   | Species    | Value          |
|--|------------|----------------|
| Methyl Acetate                         | Human      | Not classified |
| Toluene                                | Guinea pig | Not classified |
| Hydrotreated Heavy Naphtha (Petroleum) | Guinea pig | Not classified |

### Respiratory Sensitization

For the component/components, either no data are currently available or the data are not sufficient for classification.

### Germ Cell Mutagenicity

| Name                                   | Route    | Value  |
|--|----------|--|
| Methyl Acetate                         | In Vitro | Not mutagenic  |
| Methyl Acetate                         | In vivo  | Not mutagenic  |
| Dimethyl Ether                         | In Vitro | Not mutagenic  |
| Dimethyl Ether                         | In vivo  | Not mutagenic  |
| Cyclohexane                            | In Vitro | Not mutagenic  |
| Cyclohexane                            | In vivo  | Some positive data exist, but the data are not sufficient for classification |
| Toluene                                | In Vitro | Not mutagenic  |
| Toluene                                | In vivo  | Not mutagenic  |
| Hydrotreated Heavy Naphtha (Petroleum) | In vivo  | Not mutagenic  |
| Hydrotreated Heavy Naphtha (Petroleum) | In Vitro | Some positive data exist, but the data are not sufficient for classification |
| Methylene Chloride                     | In vivo  | Not mutagenic  |
| Methylene Chloride                     | In Vitro | Some positive data exist, but the data are not sufficient for classification |

### Carcinogenicity

| Name                                   | Route      | Species                 | Value  |
|--|------------|-------------------------|--|
| Dimethyl Ether                         | Inhalation | Rat                     | Not carcinogenic   |
| Toluene                                | Dermal     | Mouse                   | Some positive data exist, but the data are not sufficient for classification |
| Toluene                                | Ingestion  | Rat                     | Some positive data exist, but the data are not sufficient for classification |
| Toluene                                | Inhalation | Mouse                   | Some positive data exist, but the data are not sufficient for classification |
| Hydrotreated Heavy Naphtha (Petroleum) | Dermal     | Mouse                   | Some positive data exist, but the data are not sufficient for classification |
| Hydrotreated Heavy Naphtha (Petroleum) | Inhalation | Human and animal        | Some positive data exist, but the data are not sufficient for classification |
| Methylene Chloride                     | Inhalation | Multiple animal species | Carcinogenic   |

### Reproductive Toxicity

#### Reproductive and/or Developmental Effects

| Name           | Route      | Value                                  | Species | Test result         | Exposure Duration    |
|----------------|------------|--|---------|---------------------|----------------------|
| Dimethyl Ether | Inhalation | Not classified for development         | Rat     | NOAEL<br>40,000 ppm | during organogenesis |
| Cyclohexane    | Inhalation | Not classified for female reproduction | Rat     | NOAEL 24 mg/l       | 2 generation         |

|  |            |  |                         |                     |                        |
|--|------------|--|-------------------------|---------------------|------------------------|
| Cyclohexane                            | Inhalation | Not classified for male reproduction   | Rat                     | NOAEL 24 mg/l       | 2 generation           |
| Cyclohexane                            | Inhalation | Not classified for development         | Rat                     | NOAEL 6.9 mg/l      | 2 generation           |
| Toluene                                | Inhalation | Not classified for female reproduction | Human                   | NOAEL Not available | occupational exposure  |
| Toluene                                | Inhalation | Not classified for male reproduction   | Rat                     | NOAEL 2.3 mg/l      | 1 generation           |
| Toluene                                | Ingestion  | Toxic to development                   | Rat                     | LOAEL 520 mg/kg/day | during gestation       |
| Toluene                                | Inhalation | Toxic to development                   | Human                   | NOAEL Not available | poisoning and/or abuse |
| Hydrotreated Heavy Naphtha (Petroleum) | Inhalation | Not classified for development         | Rat                     | NOAEL 2.4 mg/l      | during organogenesis   |
| Methylene Chloride                     | Inhalation | Not classified for female reproduction | Rat                     | NOAEL 5.2 mg/l      | 2 generation           |
| Methylene Chloride                     | Inhalation | Not classified for male reproduction   | Rat                     | NOAEL 5.2 mg/l      | 2 generation           |
| Methylene Chloride                     | Inhalation | Not classified for development         | Multiple animal species | NOAEL 4.3 mg/l      | during gestation       |

**Target Organ(s)**

**Specific Target Organ Toxicity - single exposure**

| Name                                   | Route      | Target Organ(s)                   | Value  | Species                | Test result         | Exposure Duration      |

| Hydrotreated Heavy Naphtha (Petroleum) | Inhalation | nervous system  | Not classified   | Rat                     | LOAEL 4.6 mg/l        | 6 months  |
| Hydrotreated Heavy Naphtha (Petroleum) | Inhalation | kidney and/or bladder                                     | Not classified   | Rat                     | LOAEL 1.9 mg/l        | 13 weeks  |
| Hydrotreated Heavy Naphtha (Petroleum) | Inhalation | respiratory system  | Not classified   | Multiple animal species | NOAEL 0.6 mg/l        | 90 days   |
| Hydrotreated Heavy Naphtha (Petroleum) | Inhalation | bone, teeth, nails, and/or hair   blood   liver   muscles | Not classified   | Rat                     | NOAEL 5.6 mg/l        | 12 weeks  |
| Hydrotreated Heavy Naphtha (Petroleum) | Inhalation | heart   | Not classified   | Multiple animal species | NOAEL 1.3 mg/l        | 90 days   |
| Methylene Chloride                     | Inhalation | kidney and/or bladder                                     | Some positive data exist, but the data are not sufficient for classification | Rat                     | LOAEL 6.95 mg/l       | 2 years   |
| Methylene Chloride                     | Inhalation | liver   | Some positive data exist, but the data are not sufficient for classification | Rat                     | NOAEL 0.17 mg/l       | 2 years   |
| Methylene Chloride                     | Inhalation | respiratory system  | Some positive data exist, but the data are not sufficient for classification | Multiple animal species | LOAEL 35 mg/l         | 8 weeks   |
| Methylene Chloride                     | Inhalation | heart   | Not classified   | Human                   | NOAEL Not available   |           |
| Methylene Chloride                     | Inhalation | immune system   | Not classified   | Rat                     | NOAEL 18 mg/l         | 28 days   |
| Methylene Chloride                     | Ingestion  | liver   | Some positive data exist, but the data are not sufficient for classification | Rat                     | LOAEL 1,200 mg/kg/day | 3 months  |
| Methylene Chloride                     | Ingestion  | blood   | Not classified   | Rat                     | NOAEL 249 mg/kg/day   | 2 years   |
| Methylene Chloride                     | Ingestion  | kidney and/or bladder                                     | Not classified   | Rat                     | NOAEL 1,469 mg/kg/day | 3 months  |
| Methylene Chloride                     | Ingestion  | eyes  | Not classified   | Rat                     | NOAEL 249 mg/kg/day   | 104 weeks |

**Aspiration Hazard**

| Name                                   | Value             |
|--|-------------------|
| Cyclohexane                            | Aspiration hazard |
| Toluene                                | Aspiration hazard |
| Hydrotreated Heavy Naphtha (Petroleum) | Aspiration hazard |

Please contact the address or phone number listed on the first page of the SDS for additional toxicological information on this material and/or its components.

**SECTION 12: Ecological information**

No data available.

## SECTION 13: Disposal considerations

### 13.1. Disposal methods

Dispose of contents/ container in accordance with the local/regional/national/international regulations.

Incinerate in a permitted waste incineration facility. Facility must be capable of handling aerosol cans. As a disposal alternative, utilize an acceptable permitted waste disposal facility. Empty drums/barrels/containers used for transporting and handling hazardous chemicals (chemical substances/mixtures/preparations classified as Hazardous as per applicable regulations) shall be considered, stored, treated & disposed of as hazardous wastes unless otherwise defined by applicable waste regulations. Consult with the respective regulating authorities to determine the available treatment and disposal facilities.

## SECTION 14: Transport Information

For Transport Information, please visit <http://3M.com/Transportinfo> or call 1-800-364-3577 or 651-737-6501.

## SECTION 15: Regulatory information

### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

#### Global inventory status

All applicable chemical ingredients in this material are listed on the European Inventory of Existing Chemical Substances (EINECS), or are exempt polymers whose monomers are listed on EINECS. Contact 3M for more information. The components of this material are in compliance with the provisions of the Korea Chemical Control Act. Certain restrictions may apply. Contact the selling division for additional information. The components of this material are in compliance with the provisions of Australia National Industrial Chemical Notification and Assessment Scheme (NICNAS). Certain restrictions may apply. Contact the selling division for additional information. The components of this material are in compliance with the provisions of Japan Chemical Substance Control Law. Certain restrictions may apply. Contact the selling division for additional information. The components of this material are in compliance with the provisions of Philippines RA 6969 requirements. Certain restrictions may apply. Contact the selling division for additional information. The components of this product are in compliance with the new substance notification requirements of CEPA. The components of this product are in compliance with the chemical notification requirements of TSCA. All required components of this product are listed on the active portion of the TSCA Inventory.

## SECTION 16: Other information

**National Fire Protection Association (NFPA) hazard ratings are designed for use by emergency response personnel to address the hazards that are presented by short-term, acute exposure to a material under conditions of fire, spill, or similar emergencies. Hazard ratings are primarily based on the inherent physical and toxic properties of the material but also include the toxic properties of combustion or decomposition products that are known to be generated in significant quantities.**

**Health: 2 Flammability: 4 Instability: 0 Special Hazards: None**  
**Aerosol Storage Code: 2**

National Fire Protection Association (NFPA) hazard ratings are designed for use by emergency response personnel to address the hazards that are presented by short-term, acute exposure to a material under conditions of fire, spill, or similar emergencies. Hazard ratings are primarily based on the inherent physical and toxic properties of the material but also include the toxic properties of combustion or decomposition products that are known to be generated in significant quantities.
